

Pre-Proceedings of the Third International Conference on Weigh-in-Motion (ICWIM3)

The International Conference on Weigh-in-Motion (ICWIM) has grown from the initial European conferences, organized by the European COST 323 Management Committee, held at Zurich in 1995 and at Lisbon in 1998.

This pre-proceedings book and the post-proceedings on CD will contribute to the wide dissemination of advanced knowledge and findings in the field of Weigh-in-Motion (WIM).

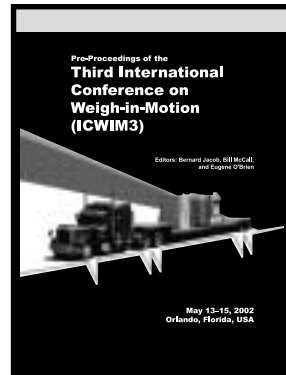

The papers presented during ICWIM3 have been carefully selected and reviewed by the International Scientific Committee on WIM and revised by the authors as necessary. The papers presented in this pre-proceedings span a wide range of topics including technologies, research, and applications and reflect many perspectives.

Topics include:

- Technology field testing
- WIM standards and testing
- Application of WIM for enforcement and automated operation
- Application of WIM for structures and pavements
- WIM data processing and application
