## FHWA Concrete Admixture Workshop

**December 18, 2001**  
**Ames, Iowa**

City, county, and state engineers, consultants, contractors, and concrete producers involved in pavement quality control and mix design will benefit from this event. The workshop will provide up-to-date information and lessons about chemical admixtures, which are integral components of modern concrete mixes.

Topics will include

- fundamentals of concrete admixtures
- field experiences and future needs
- water reducers, including self-compacting concrete

- shrinkage-reducing admixtures
- accelerating and retarding admixtures
- admixtures that mitigate corrosion
- special admixtures, including colors

Registration information is in the mail and online at [www.ctre.iastate.edu/calendar/](http://www.ctre.iastate.edu/calendar/).
